

Formal Techniques in Real-Time and Fault-Tolerant Systems: 5th International Symposium, FTRTFT98, Lyngby, Denmark, September 14-18, 1998, Proceedings (Lecture Notes in Computer Science)

This book constitutes the refereed proceedings of the 5th International Symposium on Formal Techniques in Real-Time and Fault-Tolerant Systems, FTRTFT98, held in Lyngby, Denmark, in September 1998. The 22 revised full papers presented were carefully selected and reviewed for inclusion in the book. Also included are four invited contributions and five tool demonstrations. The papers address the current aspects of the hot topic of embedded systems, in particular temporal logic, requirements engineering, analysis techniques, verification, model checking, and applications.

Ansgar Fehnker currently works at the Department of Formal Methods and Tools (FMT) Dec 2016 2016 3rd Asia-Pacific World Congress on Computer Science and . In this work, we combine ideas from run-time verification, static analysis and Fault-Tolerant Systems, 5th International Symposium, FTRTFT98, Lyngby, - 21 sec and Fault-Tolerant Systems: 5th International Symposium, FTRTFT 98, Lyngby The 9th International Workshop on Java Technologies for Real-time and ..
