

Code of Practice for Cyber Security in the Built Environment (Iet Standards)

This code of practice explains why and how cyber security should be considered throughout a buildings lifecycle and explains good practice, focusing on building-related systems and all connections to the wider cyber environment. It provides clear practical guidance to help multidisciplinary teams understand how the management of key aspects of cyber security relate to their specific jobs and responsibilities in maintaining the security of a building. It is intended to act as an integral part of an organizations overall management system ensuring the cyber security of building related systems.
