

# Arduino Programming in 24 Hours, Sams Teach Yourself

In just 24 sessions of one hour or less, Sams Teach Yourself Arduino Programming in 24 Hours teaches you C programming on Arduino, so you can start creating inspired DIY hardware projects of your own! Using this book's straightforward, step-by-step approach, you'll walk through everything from setting up your programming environment to mastering C syntax and features, interfacing your Arduino to performing full-fledged prototyping. Every hands-on lesson and example builds on what you've already learned, giving you a rock-solid foundation for real-world success!

Step-by-step instructions carefully walk you through the most common Arduino programming tasks. Quizzes at the end of each chapter help you test your knowledge.

By the Way notes present interesting information related to the discussion. Did You Know? tips offer advice or show you easier ways to perform tasks. Watch Out! cautions alert you to possible problems and give you advice on how to avoid them.

Learn how to... Get the right Arduino hardware and accessories for your needs

Download the Arduino IDE, install it, and link it to your Arduino. Quickly create, compile, upload, and run your first Arduino program. Master C syntax, decision control, strings, data structures, and functions.

Use pointers to work with memory and avoid common mistakes. Store data on your Arduino's EEPROM or an external SD card.

Use existing hardware libraries, or create your own. Send output and read input from analog devices or digital interfaces.

Create and handle interrupts in software and hardware. Communicate with devices via the SPI interface and I2C protocol.

Work with analog and digital sensors. Write Arduino C programs that control motors. Connect an LCD to your Arduino, and code the output.

Install an Ethernet shield, configure an Ethernet connection, and

write networking programs      Create  
prototyping environments, use prototyping  
shields, and interface electronics to your  
Arduino
