

Vitamin P

Inhibitions slip away and pent-up desires are explored when a pretty, but shy scientist takes a libido-enhancing trial drug her team has been working on! A brilliant, driven scientist, Nisa devotes her time to her work in the lab. Frustrated with her inability to orgasm or enjoy sex, Nisa is personally vested in the outcome of her team's latest case study of Vitamin P, a female libido-enhancing pill. She recklessly takes more than the prescribed dosage of the drug upon overhearing Ryce and Eric, her two closest male friends and fellow scientists joking about her sexless appeal. The pill unleashes powerful, hidden desires within Nisa and she revels in its orgasmic effects. Her insatiable cravings lead her into the arms of both men. However, once the pill wears off Nisa wonders if love and friendship can survive in the aftermath of her relentless passion.
